

**Special Feature**

Transform into switch or mouse

Mechanism and usage of touch panel**Introduction****68** Wide range of touch panel applications**Chapter 1****72** From applying a voltage to the electrodes to obtaining coordinates
Control method of touch panel**Chapter 2****86** Recognize features of various methods at first sight
Detecting scheme of touch panel**Appendix****95** Application by detecting scheme and suppliers**Chapter 3****99** Understanding of touch panel
Structure and mechanism of sensor part**Chapter 4****107** Necessary for smooth operation
Introduction to programming for gesture detection**Chapter 5****119** Detection of touch signals by impressed voltage
Learn from operation - Touch panel control**Chapter 6****128** Determination of button/drag control by calculating a coordinate
Learn from operation - Touch panel programming**Chapter 7****133** Easy fabrication by using resistive touch panel and LCD
Fabrication of "brain training" touch panel game**Chapter 8****143** Principle and usage of electrostatic touch sensor
Fabrication of "capacity meter" by using a PIC microcomputer**Challenge****153** Make an agriculture and rural life comfortable with electricity <1st>
Fabrication of pumping equipment for mountainous area**BASICS****159** Introduction to oscilloscope <7th>
To master the oscilloscope
Method for frequency analysis with FFT**Sensor Circuit Design****214** Reduced size with a transmitting/receiving sensor and improved detection accuracy with a log amplifier
Design of ultrasonic distance sensor unit

Fabrications

- 190** Simple logic analyzer with 8-channel/150ns sampling frequency
Logic scope by using AVR microcomputer
-
- 197** Tips and technique for improvement of writing speed
Fabrication of FPGA write tool - supplement of sister magazine DDT <2nd>
-
- 203** Experience of myoelectric potential control
Fabrication of arm-bend controller for radio control car

For Tech Specialist

- 184** Analog IC design
Designing procedure and view of high-precision OP amp

New single chip microcontroller

- 222** Built-in on-chip debug with debugging capability
Reasonable 8-bit USB microcomputer without writing tool

Series Articles

- 165** Challenge! Circuit design <7th>
To make it closer to simulation ideal characteristics
Points of high-frequency LC filter board design
-
- 173** CMOS analog circuit to the future <2nd>
SAR A-D converter with a resistance DAC
-
- 178** Challenge to CMOS analog IC design <2nd>
Until a CMOS IC is produced
-
- 210** Pitfall of circuit - Troubleshooting ABC <5th>
Watch out for CTR during photointerrupter circuit design
-
- 228** Excellent parts box <9th>
Built-in power MOS current detection circuit at 32V/1A
Power drive microcomputer "PowerPSoC"
-
- 234** Ethiopian news <6th>
Fabrication and experiment of FM transmission antenna
-
- 238** Q&A - First-time measure against noise <9th>
Role of bypass capacitor and how to reduce the number of implementation
-
- 236** Selected new products (with a gift)
LT3092/VIPer15/MMA7660FC/ADP5588

- 239** Reader's Forum **240** Information **242** Next issue/From Editors
