

Special Feature

Challenge to programmable and flexibly controllable power supply circuits

Power electronics world expanded by digital control

Introduction

64 Why is the power electronics digitally controlled?

Chapter 1

Mechanism for power control with PMW output of microcontroller

66 Introduction to power electronics

Chapter 2

Mechanism for better control than analog IC

78 Introduction to microcontroller for power electronics

Chapter 3

Need peripheral functions for conditioned reflex operation besides arithmetic processing

93 Features of microcontrollers that support power electronics

Chapter 4

Procedure for actual fabrication and operation

101 Fabrication experience of digital control buck converter by using dsPIC

Appendix

120 Flexible digital control of power supply make it better than analog control

Chapter 5

Start from paving the way for complex digital control

122 Introduction to feedback control as buck converter an example

Chapter 6

Fabrication of circuits taking advantage of digital control

129 Try out a power electronic microcontroller as PFC and fluorescent inverter examples

Appendix

144 Introduction of various power electronic microcontrollers

Chapter 7

PI controller design by using dsPIC

145 First step for PFC digital control

BASICS

180 Introduction to oscilloscope <9th>
To master the oscilloscope

Basic measurement technique for power supply

Challenge

206 Make an agriculture and rural life comfortable with electricity <2nd>
Fabrication of rice malt room with microcontroller control

Support information for supplemental boards

212 Operation of USB microcontroller from PC <11th>
On-chip debug method by using emulator

For Tech Specialist

- 154 Think about thermal management of surface mount
Acceptable loss and heat dissipation design of surface mount power IC

For Power Electronics Engineer

- 162 Conversion of voltage instruction from dimmer into LED drive current and light adjustment
Design method for peripheral circuits of triac light dimmer LED driver "LM3445"

- 229 Think about efficiency and usage of solar power

Fabrications

- 219 Realize the environment at -25°C to $+70^{\circ}\text{C}$ with familiar devices
Fabrication of simple thermostatic chamber by using PSoC
- 225 Make a current transformer by modification of commercially available power transformer
Fabrication of simple AC power meter

Series Articles

- 172 Excellent parts box <10th>
200mA output! Low noise with LC filter
Charge pump type DC-DC converter "LM2662"
- 189 Pitfall of circuit - Troubleshooting ABC <6th>
Conversion of sine wave into logic signal with comparator
- 194 Challenge to CMOS analog IC design <3rd>
An IC part - MOS transistor
- 200 CMOS analog circuit to the future <3rd>
Charge redistribution type SAR A-D converter
- 216 Performance and usage of Low ESR capacitor <5th>
Solid electrolytic capacitor
- 230 Ethiopian news <7th>
Solar system and charge controller
- 234 Q&A - First-time measure against noise <10th>
How to reduce cable discharge noise
- 233 Selected new products (with a gift)
TSV61x/LP314x/others
