

Special Feature

Complete use of micro-computers with on-chip USB

Introduction

56 Coming age! to be able to make full USB system

Appendix1

60 Coming Soon ! Transistor Gijutsu extra edition [ypreliminary]
 Under construction! top performance H8 microcomputer board

Chapter 1

63 Story #1: Use the data I/O device controlled by PC "USB simple measurement device" as an example
 What is necessary to make a USB system?

Chapter 2

73 Story #2: Capable of automatically measure the basic characteristics of transistors
 Making hardware of USB terminal

Chapter 3

87 Story #3: Automatic recognition of connection, data transmission, analog circuit control
 Programing microcomputer of USB terminal

Chapter 4

102 Story #4: Fabrication of operation screen controlled by a button
 Programming of PC to operate a USB terminal

Chapter 5

112 Understanding of firmware and application functions
 Mechanism of USB communication

Appendix2

123 List of more than 100 types of commercially available one-chip products
 USB microcomputers selection guide

Chapter 6

128 Make by using 8bit one-chip microcomputer without the need for writer
 Fabrication of gain/phase/impedance frequency characteristic measurement device

Chapter 7

139 Use an USB dongle board for analog or digital with complete control
 Fabrication of simple I/O devices from Windows

Chapter 8

146 Replace PIC writer with bootloader
 Fabrication of self-programmable USB PIC microcomputer module

Appendix3

152 Countermeasure of electrification/malfunction/damage with USB isolator
 Hint for making a reliable USB terminal

BASICS

163 Introduction to digital filter without mathematical formula (4th)
 Introduction to digital filter without formula

Fabrication

- 176** Output 0.8~16V/3A, amperometric maximum sensitivity at 10 μ A
Fabrication of experimental power supply with output current and voltage monitor
-
- 183** Make an agriculture and rural life comfortable with electricity <6th>
Fabrication of device for wireless transmission of measured temperature (2nd)
-
- 189** From S parameter analysis of RF circuit to electromagnetic analysis
Test report of free high-frequency simulator "Ansoft Designer SV"
-
- 208** Water level detection of tank and pressurized pump/Automatic control of turning on/off the water
Fabrication of rainwater supply system by using the PIC microcomputer
-
- 217** Useful for AM radio local oscillator
Fabrication of PLL phase comparator by using the PIC microcomputer

Series Articles

- 168** Challenge to CMOS analog IC design <7th>
Simulation by using the free analog IC design tool "NS-Tools"
-
- 202** CMOS analog circuit to the future <7th>
Pipeline A-D converter to realize input band at more than 10MHz and 12bit resolution
-
- 222** Learn from one's mistakes <1st>
Output oscillation of mass produced IC
-
- 224** Ethiopian news <11th>
Repair of rice-cake making machine
-
- 226** Checkmate circuit <2nd>
Fine adjustment of gain by using a potentiometer
-
- 227** Reader's Forum **228** Information **230** Next issue/Editorial voice
